Title: Community information session on Portland Harbor Cleanup, August 22, 5pm

Dear Editor,

Articles concerning the U.S. Environmental Protection Agency and the Portland Harbor cleanup site appeared in the July 26 and August 9 issues of the *St. Johns Review*. The EPA will hold a community information session on August 22 at the BES Water Lab, 6543 N Burlington Avenue. Open House will begin at 5pm and we'll be available to meet community members, answer your questions and provide Portland Harbor cleanup fact sheets. The information session will begin at 5:30pm. The purpose of the session is to clarify information related to confined disposal facilities and answer some questions received from the community. Portland Harbor fact sheets and frequently asked questions on confined disposal facilities are available on the EPA website www.epa.gov/region10/portlandharbor and http://www.epa.gov/region10/pdf/ph/sitewide/cdf_qanda_fs_011412.pdf

Please contact Alanna Conley at 503-326-6831 for hard copies of fact sheets or meeting details.
